

# Tetra Pak etching Process

1. Trace your design

2. Trace all the outlines and shading will want to represent.

### 3. Collect a Tetra pak

4. Flip over your tracing paper and masking tape down the design to the tetra pak

5. Draw over your traced lines to transfer your design onto your tetra pak

6. Using a protractor score into your tetra pak following the lines you created

7. To create a black background, you will need to peel off the layer of foil, Gently pick and peel off parts of the design you intend to be black

8. When finished, put on gloves and apply/rub ink on top of your design

9. Once applied all over design, use tissue to rub away ink on foil. Keep in mind areas of shading where ink can be left. Leave to dry
